RE: Recycled Content

To: Our Valued Customers

Subject: Cast Iron Soil Pipe and Fittings Recycled Content

AB&I Foundry certifies that we manufacture no-hub and hub and spigot pipe and fittings in Oakland, California and that their products are ICC-ES certified as 95% post-consumer recycled scrap metal content. Furthermore, AB&I cast iron soil pipe and fittings are 100% recyclable at the end of their service life.

AB&I's products are made by using a high-content of post-consumer recycled material which prevents thousands of tons of scrap iron from being deposited into landfills annually. AB&I sources over 50% of their post-consumer recycled scrap iron within a 500-mile radius of the foundry each year.

Environmentally conscious, AB&I strives to be a zero discharge facility where everything is recycled including; water, air and waste. Currently 50,000 gallons of water are recycled every minute. The foundry is 85% efficient with electrical usage. AB&I is proud to say that their cast iron soil pipe and fittings are sustainable building products.

If you have any questions please feel free to call us at (510) 632-3467. Thank you for your continued interest in AB&I Foundry.

Respectfully,

Michael Lowe
VP Marketing and Sales
