## WADE ENTERS INTO MASTER DISTRIBUTION AGREEMENT WITH GREASE GUARDIAN™

TYLER, TX November 21, 2019: Wade, a manufacturer of premier drainage products entered into a master distribution agreement with Grease Guardian™ a leading manufacturer of grease management solutions for restaurants, commercial kitchens, and other foodservice facilities.

“A grease trap is a plumbing device designed to intercept most greases and solids before they enter a wastewater disposal system,” said David Jones, Vice President of Sales for Wade. “By now adding Grease Guardian to our portfolio, we now offer a more extensive drainage solution for our customers.”

Grease Guardian is an active and fully automatic grease removal system that is a high-quality solution to traditional grease interceptors. Space is always an issue in tight commercial kitchen spaces however, Grease Guardian has solved the challenge by creating a stainless-steel, space-saving grease removal system with the smallest possible footprint.

“We are pleased to enter the Master Distribution agreement with Wade as it will ensure availability of Grease Guardian products right across the United States,” said Des Murphy, General Manager, Grease Guardian.
